

Park Forge

*Civil Landscape &  
Construction*

[www.parkforge.com](http://www.parkforge.com)

*Possibly the most complex of our companies, Park Forge Civil, Landscape & Construction is the ultimate in multi-tasking operations.*

*Indeed it is the very nature of our seamless integration of dramatically diverse activities and functions, especially when developing utilities or landscape assets in high profile or environmentally sensitive locations, which is the success of this division.*

*Projects frequently blend soft landscape work which may include grassing, planting advanced trees or relocation of existing advanced trees with the supply of structures which include barbeques, shelters, picnic sets, signage, feature fencing and gates.*

Below is a snap shot of the vast spectrum of activities conducted by Park Forge Pty Ltd:

- Board walks
- Bushland rehabilitation
- Car parks & bus stops
- Concreting
- Remedial drainage and construction works
- Dam protection
- Easement stabilisation
- Environmental land care
- Habitat creation
- Mine rehabilitation
- Open space landscaping
- Park development & maintenance
- Recreation/walking trails
- Security and decorative fencing
- Silt fence installation
- Stream and creek reconstruction
- Urban forestry
- Wetland construction

Park Forge Pty Ltd asset management extends to include facility management and working within the structure of strategic alliances to ensure implementation of stakeholder protocols and 24/7 emergency response.

Park Forge services currently include:

#### **Response to Accidental Damage**

- This includes emergency response and temporary repairs to address high security and safety issues

#### **General Maintenance & Repair**

The wide and surprisingly diverse nature of our maintenance and repair services is due in part to our vast network and ability to quickly assess works and coordinate with the right professional or tradespeople:

- Service location and implementation (Monitoring of Dial Before You Dig)
- Buildings – internal & external
- Landscape – development & general landscape maintenance

**“Careful work practices and thoughtful application negate the need for what others in the industry refer to as necessary collateral damage.”**

- Car parks and access roads – pavement works, resealing, remedial draining, erosion and sediment control
- Repair and maintenance coordination of services – stormwater, power, communication and data
- Line marking/removal
- Safety barriers – permanent and temporary

#### Installation and or Repair of associated furniture or hardware

- Seats, lighting, rubbish receptacles, car stops, fencing, kerb and channel
- Manufacture, finish, installation and maintenance of structural steel components

#### Pedestrian and Public Access

- Installation and/or maintenance of permanent and temporary pedestrian access and safety measures

#### Vandal Defacement

- Repairs and rectification

#### Security Fencing

- Installation in accordance with Australian Standards
- Monitoring and maintenance
- Security fence signage

#### Signage (interior and exterior)

- Supply installation and maintenance of vinyl printed, timber & metal signs

#### Innovation & Invention

Natural innovators, we continually respond to new challenges as they emerge and while our contact network often allows us to quickly source solutions, we regularly innovate and invent our own including these following examples:

#### Landscape/Drainage Utility

**Systems:** Functional drainage utilities with a strong landscape and environmental flavour

**Gravel Trailbrazer® Bush Track Gravel:** This is our blend of specific gravel and binder that is laid using specialist pavement laying equipment to deliver quality, durable and aesthetically pleasing pedestrian walking tracks for natural bushland and parks

#### Establishment & Maintenance

**Watering Guidelines:** A structured watering guide that provides a measured watering allowance and timeframes which vary with climatic conditions. This provides considerable assistance in the establishment and maintenance of grasslands

**Silt Fence Installation:** Development & manufacture of fast and effective silt fence installation equipment

## Management System Certification

We are committed to ensuring that all our products and services are provided from Systems / Processes that are at the level of Industry Best Practice.

To demonstrate our commitment, the systems are being certified to the following International Standards:

AS/NZS ISO 9001:2008 for Quality Management

AS/NZS 4801:2001 and BS OHSAS 18001:2007 for OHS

ISO 14001:2004 for Environmental Management

## Asset Management
